## Profile Summary

As a recent Bachelor of Computer Applications (BCA) graduate, I possess a solid grounding in computer science and programming. A quick learner, I am enthusiastic about contributing to an organization's triumph by applying my technical expertise and fervor for technology. Eager to expand my knowledge, I am actively pursuing a challenging role to harness my skills and acquire hands-on experience in the realm of computer science. With a deep-rooted passion for technology, I am committed to continuous learning and professional development.

**12th, 2021**

**Tamil Nadu, English**

**10th, 2019**

**Tamil Nadu, English**

## Work Experience

**Jul 2025 - Present**

Dot Net Developer Trainee

**Perweria setia technologies**

Motivated .NET Developer with hands-on experience in maintaining and enhancing web applications. Started with fixing critical bugs, then successfully developed a standalone project, and currently contributing to a new project within the company. Skilled in C#, ASP.NET, MVC, SQL Server, and front-end technologies, with a focus on writing clean, efficient, and reliable code. Strong problem-solving abilities with a proven track record of quickly adapting to new challenges.

## Internship

**2 Months**

Strategy & Indicator Developer – C#.NET & Pine Script

**Kavin Globel Technologies**

designing, coding, and deploying custom trading strategies and technical indicators using C#.NET and Pine Script. Skilled in integrating algorithmic trading solutions across multiple platforms including NinjaTrader, MetaTrader 4 (MT4), MetaTrader 5 (MT5), and TradingView.

# Projects

**4 Days**

**User Management System**

A user management system built with C#, WinForms, ADO.NET, and MySQL typically involves: User Interface: A WinForms application where users can interact with the system. Database: MySQL database to store user information such as usernames, passwords, and emails. CRUD Operations: Functionality to Create, Read, Update, and Delete user records. Data Access: ADO.NET is used to connect to the MySQL database and execute SQL queries.

**7 Days**

**INVERTORY MANGEMENT SYSTEM**

My project is an Inventory Management System (IMS), designed to help businesses efficiently manage their inventory and track stock levels. It provides functionalities to monitor stock in real time, manage product details, track purchases, sales, and ensure stock levels are maintained optimally. The system is built to improve inventory control, streamline operations, and provide real-time insights into stock movement, reducing the risk of overstocking or stockouts.

# Certification

- Dot Net Bootcamp Certification
- C# Bootcamp
- C#.NET Internship (Valid upto 2025)
